

Directions: Identify each lab equipment.

ID: C

# LAB EQUIPMENT TEST

HOW TO CORRECTLY FOLD FILTER PAPER FOR FUNNEL

## Chemistry Test: Lab Equipment Identification

### Multiple Choice

Identify the letter of the choice that best completes the statement or answers the question.

1. What lab equipment is used to safely and conveniently perform reactions that require heating using a Bunsen Burner?  
A. Crucible B. Ring Stand C. Dropping Pipet D. Cleaning Brush
2. What lab equipment holds solids or liquids that may release gases during a reaction or that are likely splatter if stirred or heated.  
A. Erlenmeyer Flask B. Beaker C. Florence Flask D. Wide Mouthed Bottle
3. What lab equipment is used for holding and organizing test tubes on the laboratory counter? Also a good place to store test tubes while they dry.  
A. Buret Clamp B. Clamp Holder C. Extension Clamp D. Test Tube Rack
4. What lab equipment is rarely used by first year chemist and is used to mix chemicals that may splatter? It has a narrow neck to prevent splatter?  
A. Erlenmeyer Flask B. Beaker C. Florence Flask D. Wide Mouthed Bottle
5. What lab equipment is used for the heating of stable solid compounds and elements? Also used to separate a solid suspended in a liquid by boiling away the liquid.  
A. Watch Glass B. Volumetric Flask C. Evaporating Dish D. Wash Bottle
6. What lab equipment is used to measure volumes of liquid?  
A. Graduated Cylinder B. Separatory Funnel C. Test Tubes D. Volumetric Pipet
7. What lab equipment is used to manually stir solutions?  
A. Thermometer B. Forceps C. Stirring Rod D. Striker
8. What lab equipment is used to collect large amounts of gas and is done so by the displacement of water?  
A. Erlenmeyer Flask B. Beaker C. Florence Flask D. Wide Mouthed Bottle
9. What long tube with a small diameter is used to measure and deliver exact volumes of liquids? It is designed to measure different amounts of the liquid and uses a bulb to draw the liquid into it?  
A. Buret B. Graduated Pipet C. Condenser D. Funnel
10. What lab equipment is used to provide heat for experimentation?  
A. Test Tube Rack B. Mortar and Pestle C. Wire Gauze D. Bunsen Burner
11. What lab equipment is used to move a crucible from the heat?  
A. Crucible Tongs B. Test Tube Tongs C. Beaker Tongs D. Triangle
12. What lab equipment holds solids or liquids that will not release gases when reacted or are unlikely to splatter if stirred or heated?  
A. Erlenmeyer Flask B. Beaker C. Florence Flask D. Wide Mouthed Bottle
